DEVASHISH SHARMA

AI/ML Engineer (FinTech & Quant Systems) | devashishsharma719@gmail.com | +91 8928992654 | Mumbai, India | LinkedIn | GitHub

EDUCATION

Fr. Conceicao Rodrigues College of Engineering — **Bandra, Mumbai**
B.E. in Artificial Intelligence and Data Science — **2022 - 2026**

R.R. International College — **Borivali, Mumbai**
Higher Secondary Certificate (HSC) - Science — **2020 - 2022**

TECHNICAL SKILLS

Machine Learning Core: Supervised & Unsupervised Learning, Feature Engineering, Hyperparameter Tuning, Model Serving, Imbalanced Classification, XGBoost, Scikit-Learn, PyTorch, FinBERT, SHAP, Anomaly Detection

GenAI & NLP: Retrieval-Augmented Generation (RAG), Multi-Agent Orchestration, Semantic Search, Hallucination Guardrails, Prompt Engineering, LlamaIndex, Mistral 7B, Ollama, FAISS, ChromaDB

Quant & Financial Math: Time Series Modeling, Market Microstructure, Order Flow Imbalance (OFI), Risk-Adjusted Alpha, Sharpe Ratio, Monte Carlo (GBM), VaR/CVaR, Half-Kelly Sizing

Systems & MLOps: Asynchronous Architecture (AsyncIO), RESTful Microservices, Prometheus Telemetry, Containerization (Docker), ETL Pipelines, FastAPI, NetworkX, Pandas, NumPy

Programming & Tools: Python, SQL (PostgreSQL, SQLite), C / C++, Bash, Git, GitHub, Linux, Postman, Streamlit

PROFESSIONAL EXPERIENCE

Praveedh Decor - Software Developer — **Mar 2026 - Sep 2026**

- Architected and deployed **12+** production data applications and automated tools, reducing manual processing overhead by **40%**.
- Engineered automated Python ETL pipelines and **n8n** webhooks, streamlining daily transactional data ingestion across **3** departments.
- Developed a full-stack real-time telemetry portal with **sub-second** latency to monitor operational state transitions and inventory tracking.
- Implemented automated statistical threshold alerts, reducing inventory and ledger discrepancies by **25%** while mitigating delays.

Techronic IT Solutions - AI & Data Engineer — **Dec 2025 - Feb 2026**

- Engineered data ingestion pipelines and database infrastructure tracking **5+** commercial distribution branches.
- Conducted time series modeling and demand forecasting on showroom sales to optimize multi-location stock and capital allocation.
- Automated daily multi-branch audit and reconciliation workflows via Python scripts, reducing manual turnaround by **30%**.
- Optimized relational SQL schemas tracking over **5,000+** monthly retail transactions with zero data integrity loss.

AI & FINTECH PROJECTS

UPI Fraud Detection & Defense SOC Engine — ***Python, XGBoost, FastAPI, NetworkX***

- Engineered real-time fraud pipeline via XGBoost with feature engineering and hyperparameter tuning, achieving **96% recall** on imbalanced classification (**99:1** normal-to-fraud ratio).
- Built 3D Haversine impossible travel detection (**>Mach 1**) and NetworkX money-mule graph analysis across **1M+** synthetic DPDP transactions.
- Integrated SHAP TreeExplainers for local feature attribution, paired with automated **ISO 8583** switch freeze SOAR playbooks in **<20ms**.
- Constructed asynchronous architecture (AsyncIO) RESTful microservice on FastAPI with Prometheus telemetry and Dark Web threat feeds.

SEC Filings Intelligence & Forensic RAG Engine — ***LlamaIndex, FAISS, Mistral 7B, FastAPI***

- Architected Retrieval-Augmented Generation (RAG) pipeline via LlamaIndex & FAISS for **sub-50ms** semantic search on SEC **10-K** filings.
- Engineered quantitative forensic models: Beneish **8-variable** M-Score, Altman **Z-Score**, and **5-factor** DuPont ROE decomposition.
- Deployed Mistral 7B (**4-bit GGUF**) with prompt engineering and strict chunk citation hallucination guardrails to eliminate LLM hallucinations.
- Designed interactive forensic dashboard with Plotly 3D risk radar, automated **PDF dossiers**, and SEC AI copilot.

Autonomous Quantitative Alpha Terminal & Swarm — ***FinBERT, XGBoost, Monte Carlo, L2 Depth***

- Architected institutional multi-agent orchestration swarm (**11 microbots**) where autonomous agents vote on live trade execution mandates.
- Engineered **10-tier** NSE L2 order book market microstructure simulator computing Order Flow Imbalance (OFI), VWAP, and slippage friction.
- Built **1,000-path** Monte Carlo GBM engine computing risk-adjusted alpha, Sharpe ratio (**1.84**), and **95%/99%** VaR/CVaR risk budgets.
- Conducted backtesting on **5 years** of historical data modeling Indian market frictions (**0.10% STT**, **Rs 20** brokerage) with Half-Kelly sizing.

CERTIFICATIONS

- Machine Learning Specialization - DeepLearning.AI (Coursera)
- Artificial Intelligence Foundations - IBM SkillsBuild
- Data Science & Machine Learning with Python - Kaggle
- Data Analytics Job Simulation - Deloitte

HONORS & LEADERSHIP

- Finalist at TSEC HackDeck **24-Hour** Hackathon (Algorithmic Trading & FinTech Track)
- NSS Volunteer: Directed community development camps and tech-literacy drives, contributing **120+ hours** annually to social impact programs.
